Picture quality is generally excellent, with only a few minor points for concern. Foreground subjects were well detailed, but more distant objects, such as brickwork or foliage, showed the slight mottling of JPEG artefacts when the photo was examined at 100 per cent. Brightly backlit subjects revealed slight purple fringing too. On the plus side, colours were vibrant without being oversaturated, and when printed on 6 x 4in paper, we had to look closely to spot texture averaging. The macro mode is superb, and can take pictures from less than 3cm away with no difficulty. White balance is similarly comprehensive. The automatic setting captured images to our satisfaction, but there are also manual modes to choose between two fluorescent settings, tungsten and two daylight settings, as well as an evaluative option. There's a Long Shutter option, which will be sufficient for nighttime or flashfree snaps, but anyone looking to explore more creative or demanding situations will find it a frustration. But it's the added features that make the IXUS 55 our compact digital of choice. Select the continuous shooting mode and you'll be able to shoot at two frames per second until your memory card is full. And although there's no panoramacompiling feature on the camera, there's a stitch assist mode that saves the last fifth of an image to help with alignment, and then Canon's userfriendly PhotoStitch software does the rest when you get to a PC. The IXUS 55 is a natural A List resident. Good looks, stacks of features, excellent image quality, plus a battery life best measured in days means this is a camera that will keep both beginners and enthusiasts happy.
