After purchasing a new item, sometimes the product manuals can get caught up in the packaging and discarded or over time can get mislaid. Most of us think, I would never open up the product to find out what is wrong, so what do I really need my manual for. The assumption that your product manual is only for people with great technical skill is a misconception. Purchasing a service manual for your copier can save time, money and aggravation. The user manual and service guide for your copier provides important information about its daily use and care. If you've thrown out your service manual, lost it or have bought a used copier without one, purchasing a new one is always a great idea. The service manual isn't just necessarily for all the high tech questions like how to troubleshoot problems or disassemble parts of the copier. Having a service manual handy is important to extend the life of your copier as it provides dos and don'ts for proper operation and care.

Most manuals will provide tips on saving energy and prolonging the life of the ink cartridges. Of course there are always the times when you might need tips for troubleshooting a problem. It may not seem that a copier would need a service manual, but you will be surprised to find lots of helpful information for the daily use and Page 2 and 3 servicing of your photocopier.
