Battery charge Gel bottle 50 g Thermal paper roll 30 m Ultrasound Frequency 2, 5 or 8 MHz continuous wave Transducer 2 crystal narrow beam Output power 9 hours Size 28 x 30 x 13 cm Weight 2,5 kg Internal battery autonomy 4 hours recharge in 90 minutes Footswitch Carrying case Manual English, Italian, French portable, bidirectional, vascular doppler BIDIRECTIONAL DOPPLER NON STEREO with two probes 4 and 8 MHz. Continuous wave CW bidirectional doppler equipped with electronic probes for high sensitivity and low background noise. Bidirectional graphic separation of flow forward and reverse LCD graphic display for real time display of forward and reverse flow in bidirectional or separate mode Selectable amplitude scale 1, 2, 4, 8 khz.Preset zero line. 5 minutes 300 sec. continuous and reviewable memorized test. Operator can select the most meaningful exam and print it. Calculation of heart rate, peak flow and mean flow. Simultaneous connection of high sensitivity probes Internal rechargeable large capacity battery NiCd 1.8 Ah; the system can be operated during charging. Its probes are ideal for use by a General Practitioner, vascular specialist for routine vascular examination in ER for vessel location, or by specialists in diabetes, urology and gynaecology. Vascular flow signals and FHR are easily located using the transducer while internal signal processing minimises noise artefacts. Mindray is committed to bestinclass image quality and easy optimization tools as good as a much bigger system. The M5 integrates brilliant color imaging capability with uncompromised 2D performance. The Multibeam Parallel imaging MBP increases temporal resolution and realtime frame rate, while collecting useful information to rebuild high quality images. Image homogenization full fills the whole field up to

30cm deep. The M5 offers complete imaging modes 2D, M, PW, HPRF, CW, Color, Power and DirPower.

Optional software modules to be added with M5 CW continuous wave Doppler for more accurate cardiac diagnosis. Smart3D leads to vivid ultrasound healthcare, isocore View panoramic imaging and 1 trapezoidal imaging expands 6 to a wider field of vision. Postprocessing Ycorrection, gray transformation, gray rejection. M mode distance, time, velocity, heart rate. Special cardiology package LV, mitral valve, CO, LVET., Special fetal growth analysis software. Without probes. Professional portable ecograph with wide range of probes and high quality of images suitable in many specialistic fields. The widespread adoption of DR systems has been limited only by its high cost, that is until now. We are delighted to introduce the new Naomi DR system. Added to the increased productivity of producing an image ready for reading in 30 seconds, the Naomi solution can pay for itself in a matter of months depending on volume. BUCKY USB cable total Integration with your Existing Equipment Doctors can use their existing equipments and xray generators. NAOMI occupies a small space in a clinic. Just replace the film cassette with the NAOMI captureplate in the existing Xray environment and connect to the PC through a USB cable. There is no waiting time for the processor to warm up or worrying about vestiges of the consumable materials. The short preparation time and immediate availability of Xray examination are the main advantages for digital radiography. It provides more information on a single image to support diagnosis from various angles. DICOM software is included with NAOMI Fits on the Xray table with the sliding tray for NAOMI Fits around the sensor to make the Xray table flat Active area mm 290x x x450 Size mm 320x305x60 444x494x62 474x589x62 Resolution 4608x x x7872 Resolution megapixel Weight kg Easy to operate and adjust, provide accurate and precise performances.
